**Broadcast Date:** Thursday, February 24, 2011  
**Time:** 10:00 AM PT / 12:00 PM CT / 1:00 PM ET  
**Duration:** One hour

### Speakers:

**Bob Aiello**, Editor-in-Chief, CM Crossroads

This Webcast will focus on practical strategies for engineering release automation and enabling effective IT Service Management. Keeping up with Agile iterative development requires measurable release deployments that allow your team to confidently deploy and manage critical applications. Nolio provides the structure and automation framework to manage and continuously improve your critical DevOps processes. Join us for an enlightening presentation on practical methods that will help you engineer your release automation to support Agile operations.

### About the Presenters:

**Bob Aiello**,  
Editor-in-Chief,  
CM Crossroads

Bob Aiello is a Consultant, Editor-in-Chief for CM Crossroads and the author of CM Best Practices: Practical Methods that Work in the Real World, Addison-Wesley Professional (<http://cmbestpractices.com>). Mr. Aiello has over 25 years experience as a technical manager in several top NYC Financial Services firms where he had company-wide responsibility for CM, often providing hands-on technical support for enterprise Source Code Management tools, SOX/Cobit compliance, build engineering, continuous integration and automated application deployment. Bob has served as the Vice Chair of the IEEE 828 Standards working group (CM Planning) and is a member of the IEEE Software and Systems Engineering Standards Committee (S2ESC) Management Board. Mr. Aiello holds a Masters in Industrial Psychology from NYU and a B.S. in Computer Science and Math from Hofstra University. You may contact Mr. Aiello at [bob.aiello@ieee.org](mailto:bob.aiello@ieee.org), link with him at <http://www.linkedin.com/in/bobaiello> or visit his corporate website <http://yellowspiderinc.com>

### About the Sponsor:

Nolio the leader in application service automation, is committed to helping customers meet the growing challenges and complexities of releasing and managing applications across the data center - increasing application uptime and reducing IT operation costs. Nolio customers including enterprises, online services and SaaS businesses rely on Nolio ASAP to automate application deployment, maintenance, remediation and recovery processes for physical, virtual and cloud infrastructures - delivering automation solutions for application-centric IT.
